Feed Situation Becomes Serious

Government Cannot Obtain More Feed Say the Minister of Agriculture

"We are facing a most serious situation. The government has obtained practically all the hay it can buy in the East. Nearly 800 cars of hay are on order in Ontario, and these are coming west at the rate of about 25 cars daily, but we are being deluged with orders for feed from between 700 and 800 places in the province right now and we simply cannot supply the feed that is required. Farmers and others in need of hay or feed must take what steps they can to get this feed without depending on the government. We have done everything possible but owing to unprecedented conditions we simply cannot provide relief for all at the present time."

This was the warning issued in the legislature Thursday afternoon by Hon. Duncan Marshall, minister of agriculture, who moved the adjournment of the house on the matter as being of grave public importance. Mr. Marshall said the feed situation was the most serious proposition that he had ever been up against in the province.

Asker

Lost we forget, so thought old winter, fearing that Christmas was fast vanishing from our memories, so a very generous donation of snow and ice was contributed for our Easter celebration.

Mrs. A. Woyen and children spent a few days with relatives here last week.

Mr. and Mrs. Nansen Vold are now comfortably settled in their new home on the A. Woyen place.

Miss Ruth Ravensborg spent Easter Sunday at home with her parents.

Mrs. E. Hoyhak is not feeling very well these days.

Miss G. Holmes went to Lacombe on Thursday to spend the Easter holidays at home with her mother.

Mrs. George Kraft, of Hinesburg, accompanied by little daughter, is spending a few weeks, the guest of Mrs. J. Oas.

San Francisco, April 1.—The Prince of Wales will be the lunch-guest of Admiral Clarence Williams, acting commander of the Pacific fleet, aboard the flagship, New Mexico, at San Diego, early next week, according to announcement of staff officers. The New Mexico is being overhauled here, steaming south later in the week.

Weddings

DORAN-GRAHAM

A quiet wedding took place at Edson, Alberta, on Tuesday, Feb. 17th, when Miss Magdalene Patricia Doran, of Chesterwall, and Mr. Raymond J. Graham, of Rosevear, were united in marriage. They were attended by Miss Blanche Leora Graham, sister of the groom, and Alex, Chalmers, of McLeod Valley.

The young couple will make their home on the farm of Mr. Graham in Shining Bank district, near Rosevear.

SNIDER JOHNSTON

At Edmonton, on April 3rd, Mr. James Cecil Snider and Mrs. Hannah Johnston, both of Ponoka, were united in marriage at the McDougall Farmhouse, Rev. Lorne McTavish officiating.

WHITEFIELD LAYCOCK

One of the prettiest weddings of the season was solemnized on Monday, April 5th, at the home of M. and Mrs. Geo. Laycock, when their daughter, Bertha, was united in marriage to William Elwood Whitefield, of Glover, North Dakota. Rev. Chas. Bishop officiating. The bride, who looked charming, was attired in white messaline, and carried a bouquet of Easter lilies. She was attended by her sister, while the groom was accompanied by Mr. Raymond Ferguson.

The bridal party entered the room to the strains of the wedding march from Lohengrin, played by Mr. Mark Smith, and stood beneath a bridal arch tastefully decorated with Easter lilies and white ribbons. During the signing of the register "O, Promise Me" was sung by Mr. Walter Glauser.

The guests, who numbered 25, sat down to a sumptuous wedding breakfast, after which Mr. Bishop, in a few well-chosen remarks, heartily expressed the high esteem in which the bride is held in this community. The groom ably responded.

POULTRY CULLING

Poultry culling demonstrations that have been carried on by the Federal Live Stock Branch have clearly proved that it is possible to take out from forty to sixty per cent of the stock in the average farm flock, and still leave the flock as many eggs per day as before.

An equally valuable service of the Federal Live Stock Branch is the grading of market wool. According to the report of the minister for the fiscal year ending 1919-20, approximately 5,500,000 pounds of wool were systematically graded and sold co-operatively.

These are only examples of the services of the Federal Department of Agriculture, which has branches and divisions for the advancement of practically every phase of farming and gardening. This report, which is obtainable from The Publications Branch, Ottawa, covers concisely the work of the whole Department for the twelve-month period.

Calgary, April 3. — Inquiries from prospective Canadian settlers are being received at the rate of 100 to 150 a week at the Winnipeg office of the Grand Trunk Pacific Railway, according to a statement of H. Westcott, the immigration agent of the company, who was in Calgary on Thursday. All these, he said, were from farmers on the other side of the line. Never before has Canada been attracting so much attention in the United States, he remarked, in discussing this matter, and there was every indication that 1920 would prove a banner year in the volume of business.

Mrs. and Mrs. Whitfield left on the afternoon train for North Dakota, where they intend to make their home. Many friends gathered at the station, where a royal send-off was accorded them.

Alberta

A Big Western Problem

It is, of course, merely a trifle of observation, and a statement of what everybody knows, to declare that the Western Prairie Provinces of Canada have many difficult problems to solve in order to promote their maximum growth in population, wealth and general development. Neither time nor space would permit of even a mere recapitulation of these various and complex problems, not to speak of an intelligent consideration of even a few of them.

Asked to name the first and foremost question demanding attention by the people of the West, would, no doubt, be as varied as the people themselves. Some would say a larger population in order to develop the country, increase their production, and assist to bear the expense of the public services. Others would urge full provincial control of the natural resources in order that they might be developed for use. Others, again, would lay emphasis upon the assimilation of the foreign born into a broad and true Canadian citizenship. Better schools and a more general education for all classes would be advocated. Some would say tariff reform, or cheaper money, would be the main essentials to a betterment of conditions; while others, again, would lay stress upon social, moral and religious values. Some practical minds would say more branch lines of railways, better roads, and a general improvement in all means of transportation.

And to a greater or less degree all these things are necessary to the welfare, growth and prosperity of the Prairie Provinces. There can be no question about that. But at the present time, there looms up a problem, the solution of which would appear to be necessary without loss of time if many of these other questions are to be satisfactorily solved. And in some respects it is the most difficult of all our problems.

We refer to the need of solving the difficulties, we might almost say the disastrous conditions, confronting thousands of settlers by reason of the drought which has been visited upon the West during the last three years. So long as these conditions continue a black eye is given to immigration to this country because of the advertisement that gives western Canada abroad has an adverse effect on the arriving of new immigrants. The relief we need and must have. It affects the credit of our people, stops railway development, cripples business and imposes heavy burdens upon the helplessness and governments. Something better than the provision of temporary relief to the direct sufferers must be found.

Those who are perhaps best qualified to judge, believe the only solution is to be found in a radical change in farming methods in these districts, and the substitution of other crops. In part at least, for all grain crops which have, for the most part, been attempted in the past. It is asserted that even in these drought afflicted areas, a few farmers have been able to succeed, where the majority have failed, by reason of the fact that they followed other methods.

In the years of drought, there was not only failure of grain crops, but also of grass, with the result that there was neither food for the cattle nor feed for stock. On the other hand, some farmers were successful even in these years of lack of moisture in raising green corn and other kinds of

feed for stock when even the grasses failed. What they succeeded in doing, their neighbors could also do. It is suggested, therefore, and wisely it would seem, that steps should be taken to bring the actual experience of these men, and the methods followed by them, to the knowledge of the people generally in the districts referred to, not by books or pamphlets, but by farmers themselves telling the story of their experiences and success to groups of farmers throughout these areas.

It is also being urged that the combined knowledge of the agricultural experts of the country should be brought to bear in an effort to solve this problem.

These experts and scientific agriculturists on experimental farms and elsewhere have evolved certain principles and varieties of grain in order to escape the loss occasioned by frosts. Along this line they have not with splendid success and the loss from frost, which formerly was a constant dread of the farmer, has been enormously decreased. Has the time not arrived when the energies of all these men should be turned into the channel of endeavoring to evolve a drought-resisting variety of wheat and other grains?

There are countries even more seriously afflicted with drought than western Canada, which, nevertheless, are succeeding agriculturally. Surely from these lands varieties of grains can be secured to be tested experimentally here.

Something must be done, and done soon, to create new conditions in the areas referred to, or else they will have to be abandoned as unfitted for agricultural settlement, with all that would mean, not only in the case of the people there, but to the whole country. It is impossible to go on, and the situation will only get worse. It will yield a crop, and in the event of a disappointment reliance upon the government for food, fuel, clothing and next season's seed, will be a constant reminder of the helplessness of the people. The country has about reached the end of this unsatisfactory policy, something more permanent, more constructive, must be put into effect to meet the needs of the people.

Predicts Rush Into Peace River Area

Oil Fields Greatest in World Says Gen. J. K. Cornwall
Ottawa.—The summer of 1920 promises to see the greatest rush into the Peace River country that has ever been seen into any section of Canada, says the prediction of Gen. J. K. Cornwall, who is here conferring with government departments in connection with matters of interest to the country. Col. Cornwall, probably the best known figure in Peace River, and a trapper and trader of 25 years' experience in the north, has been attending the fair at Montreal, where prices soared to a point that placed the fair industry of Peace River on a new high pedestal. "Watch the Peace River this year," said the enthusiastic Colonel, "will there be oil discovered? I certainly expect so. As a matter of fact, my opinion is that the year 1920 will see the opening in that north country of the greatest oil fields in the world. Texas, in comparison, will virtually fade away in comparison with the results that this fall and early spring the Peace River country will see in the shores of an oil stampede into the north that has had no precedent in this continent."

Flags of the New States

Are Entitled to Recognition at Sea and in Port

The flags which have been adopted by the new states recognized by the Allies under the Peace Treaty clauses were described in a note issued by the French Minister of Marine recently. These flags are entitled to recognition both at sea and in port, and are designated as follows: Latvia, horizontal stripes of red, white and red; Estonia, blue, black and white in horizontal stripes; Georgia, a striped flag in red, white and blue, with a red cross in the center; Armenia, a red cross in the center of a white field; Azerbaijan, a green field with a white crescent and eight stars.

Some men have a regular Sunday morning attack of homesickness when the church bells ring.

Exchange Situation Impetus for Settlers Americans Taking Good Advantage Of Rate of Exchange in Buying Farms

One of the results of the present high Canadian exchange has been made apparent during the last few weeks. Americans intending to settle in Western Canada are leaving the United States sooner than they planned and in much larger numbers than was expected. The exchange situation has provided a stimulus to American settlement in Western Canada, because the settlers find they can gain from \$125 to \$140 an acre in purchasing land. Many Americans who had purchased farms when exchange was normal, and had money in the banks, have taken advantage of the low quotation of Canadian money, and cleared off their debt payments, making a large saving.

Americans of means are paying cash for their farms. With the rate of exchange as it is today, the saving on a quarter-section of land at \$35 an acre is about \$840, which is quite an item on a \$5,000 transaction, while the ready money thus put into circulation is having a beneficial effect throughout the west, both on investments and general trade.

"SYRUP OF FIGS" CHILD'S LAXATIVE

Look at tongue! Remove poisons from little stomach, liver and bowels.

Accept "California" Syrup of Figs for the same reason. The first package, then you are sure your child is having the best, and most harmless laxative or syringe for the stomach, liver and bowels. Children love it. Directions for children's dose on each bottle. Mother! You must say "California!"

Protecting the Armenians

Public Will Not Tolerate Abandonment of the Armenians to Destruction

The only possible solution appears to be to make France the mandatory for Cilicia, if she will undertake the task. Cilicia used to be known as the Armenian Republic, and the remainder of its Armenian inhabitants must be protected. In the Sykes-Picot agreement Cilicia was included in the French zone, while the Treaty of London gave France much more extensive authority in Anatolia. As for Armenia proper, the Treaty of London gave it to the British, and the Treaty of Trianon gave it to the French. The Armenian Republic of Erivan, in Transcaucasia, was a separate entity, and its Armenian inhabitants must be protected. Mr. Lloyd George told the Armenian citizens of Manchester in 1916 that it was the responsibility of the government of this country to be not unkind to their responsibilities to your martyred race. The time has come to recall these responsibilities incurred under the Treaty of Berlin and the Cyprus Convention, and still unfulfilled. The Armenian Republic, with obligation, though the last word on the Albanian question is not yet said. Armenia must not share a fate, or what becomes of our crusade for the salvation of the small nations!—From the London Times.

Unwillingness to Work

A Growing Aversion to Downright Hard Labor

It is clear to an observer of industrial phenomena that there is in many quarters a growing aversion to down-right hard labor and a greater inclination to shirk than to produce. Man has invented machinery of many sorts and some men seem to expect that machinery will lift and carry the white-hot burden without the human effort to keep the wheels turning. A thoughtful writer in *Revue Bleue*, Louis Narquet, examines the philosophy of those who under the name of true friends of humanity teach the doctrine that to be a drone is the apex of human felicity. "First of all," says Mr. Narquet, "we should refuse the fallacy that work is dishonorable. It can be a real friend to his fellows who tries to lighten their burden with the idea that it is degrading to earn one's living in the sweat of the brow.—Philadelphia Public Ledger.

No matter how little a man believes in religion, he detests irreverence in a woman.

A female physician practiced in Mayence in the fifteenth century.

Australia And Canada

Australians and Canadians Met And Deleted 86 German Divisions

High Command, in the concluding statement of his review of Australian victories in France in 1918, quotes figures which indicate the value of the splendid work done by the Australian Corps while under his command. These figures are interesting when compared with the figures mentioned by Sir Arthur Currie.

In proportion to its population, the number of men put into the field by Australia, and the achievement in every theatre of war in which they were engaged, reflects the very high credit on the patriotism of that Dominion and on the order and bravery of the men. It is also to be remembered that the Australian force was an entirely voluntary one. There was, therefore, much greater difficulty in supplying reinforcements than in the case of Canada, which adopted conscription. The figures published show that Canada employed 60,000 men in the war, against Australia's 46,000. The total casualties were 15,000 for Canada and 12,000 for Australia. The Gallipoli expedition, where so many of Australia's best men were sacrificed, was in vain being mainly accountable for this.

According to General Monash, the actual number of separate enemy divisions engaged by the Australian Corps was 39. Many of these divisions were engaged more than once. This was between the dates March 27 and October 5, 1918, when the Australians were withdrawn from the line. The Canadians, it will be remembered, were held in reserve and were not put into the line for some months after the Australians. Sir Arthur Currie reported that, between August 8 and October 15, 47 German divisions were engaged and defeated by the Canadian Corps, and he claims to have liberated 28 cities, towns and villages and 250 square miles of territory. Thus the Australians and Canadians between them had defeated 86 German divisions, which constituted a substantial moiety of the German forces opposed to us.—From Canada, London.

Canadian Flax Trade Growing

Proposed to Encourage the Establishment of Spinning Mills in Canada

At a meeting of the Canadian Flax-Growers' Association, held in London, Ontario, recently, the members discussed a plan to extend the organization to include the flax seed industry. It was pointed out that the acreage under flax has more than doubled since the start of the war, and the quality of the Canadian seed and the quantity of the flax produced in Ireland, but all over the world. In view of this it is proposed to encourage the establishment of spinning mills in Canada on a large scale, also to bring experienced weavers to Canada from Ireland and start the industry on a sound basis. The final decision on this matter was left over until the June meeting. Several groups are in favor of having the flax seed industry in Canada, and the government is to be asked to impose such restrictions on the sale of flax that the quality of all Canadian seed put on the world market will be the best possible.

London's Farewell To Prince of Wales

Crowds Gathered at Buckingham Palace And Farewell Toasted London, Enthusiastically

The Prince of Wales has left on H.M.S. Renown for his Australian tour. The King and Queen and other members of the royal family, together with the Prime Minister and many other notabilities gathered to see him off at Victoria Station, but otherwise no ceremony was observed.

London, however, arranged its own farewells. In the forenoon, large crowds gathered at Buckingham Palace and all along the route and cheering enthusiastically as he drove along alone in his motor car. At Victoria also, an immense concourse of people broke through the barriers just before the train started, and was only brought to a halt by the men in the King's circle yowling 30 yards from the royal train.

The Prince at once stopped forward and standing alone in the roadway, saluted the cheering crowd. The people cheered in reply with great enthusiasm and the train started on its way with the roar of its farewell.

A "Branly" Heard Discovered
Colorado has made an interesting find. A mass of skeletonized bones were unearthed some time ago from a deep pit, and since then archaeologists have been occupied in piecing the bones together. The result is a singular formation. It is 14 feet high at the shoulders, with a giraffe-like neck stretching twenty feet into the air and a total length from the front of the legs to the tip of the tail of more than fifty feet. The head has a brain an inch in diameter.

Your horses pull heavy loads over all kinds of roads—make their work easy—save your horses and wagon.

Imperial Mica Axle Grease

prevents friction in the hub. As the mica flakes work into the pores of the axle and hub, the rough surfaces are smoothed with a hard filling of mica. The grease on a glassy surface insures thorough lubrication. It will last from one pound tin to a barrel.

Imperial Eureka Harness Oil

makes leather strong, pliable and waterproof. Prevents cracking and keeps the harness supple. It is a complete leather preservative. It gives leather a rich black, lasting finish.

Imperial Oil Limited

Sold in pint, quart, half-gallon, gallon and four-gallon sealed cans, kegs, barrels and drums.

Our Senses Are Untrustworthy

Scientific Development Is Making Rapid Strides in These Modern Days

Though many disagree with the view held by Sir Oliver Lodge, as to the life to come, few will challenge his right to be numbered among the first few who have changed radically the old theories of the human mind as the physical side of the universe. Any thing he cares to say to electronics, matter, the electric, the magnetic, the atomic, and must furnish food for reflection. A few days since, in the course of a lecture to an audience which filled the capacious Carnegie Hall in New York, he said, rapping a small wooden table: "This appears to be solid," and waving his arm in the air, "this appears to be empty; it is exactly opposite. You may not believe it, but it is true."

Such men as Soddy, Rutherford, John Cox, Thomson, and many other physicists tell us that our senses, calculated but to serve certain vital needs, deceive us in everything which does not touch on the daily needs of corporeal existence. They speak with authority on the electric chaos of matter; tell of a mysterious ether, which permeating all, is yet imperceptible to our senses; they show that our notions of such things as heat, light and sound are founded on hypotheses that are fundamentally false and hence misleading; and the layman finds his head reeling and his confidence in the knowledge he has acquired as a lad slipping away.

The discovery of radium has strengthened the standing of geology, because it permits of a vastly extended time-scale. The earth is no longer regarded as a world gradually growing cooler. It is in its known store of radium a source of heat which will last, not for a mere million years, but probably for tens of thousands of millions of years. It is possible that the real danger to the planet will come from too high an internal temperature, rather than from one too low. In other words, the world is more likely to find in explosion than as a dry, frozen body, as our forefathers believed. But as such a catastrophe is not hardly possible sooner than about a million years this need not cause any particular uneasiness to the present earth folk.

The subject is much too vast for more than mention, and those who are sufficiently interested should read what has been written on it by the men of science named in the foregoing—there is quite a voluminous literature to be consulted. But, very recently, another aspect of the long-sprung, quite as significant as any previous theory of the ether, electrons and matter, and of this there is as yet little to be learned from the popular being the last-born of science.—Winnipeg Free Press.

Completing Hudson Bay Line

The Winnipeg board of trade has been notified by the federal government that it will cost \$400,000 to complete the Hudson Bay Railway. To the present, 332 miles of the line have been built and about 90 miles of track are still required to bring the road to the ocean terminus at Port Nelson. The Dominion government is not yet in a position to say how much money it will be able to devote to the Bay line this year. The West is pressing for completion.

The First Coal Fire

112 Year Ago Judge Jesse Fell Lighted First Fire of Coal

In Wilkes-Barre, Pennsylvania, part of the old house still stands, and inside it the iron grate in which 112 years ago this last February Judge Jesse Fell lighted the first fire of coal. And from this first burning of coal in a grate, says the Philadelphia North American, the coal which was then called "black rock" has increased until now some 90,000,000 tons of it are yearly produced and sold for some \$700,000,000. The anniversary of that first fire grate was celebrated the other day in Wilkes-Barre, where, in fact, the "Old Fell House" and its pioneer grate are regarded as historical possessions that the city may well be proud of. The part of the house still standing is also said to be the second building in the Wyoming Valley, a substantial dwelling when the Judge purchased it in December, 1787, 111 years before he tried his successful experiment with the new fuel.

Minard's Liniment Relieves Neuralgia.

Alberta's Minerals

Collection of Specimens to be Displayed in Great Britain

To show the people over in England what Alberta can produce in the way of mineral wealth, a collection of specimens from all parts of the province have been sent to London, where it will be displayed as a permanent exhibit in the Canadian Immigration Offices. A request for such a collection was made some time ago by Col. Oble Smith, the geological surveyor in London, and the Alberta Industrial Association undertook to get it together.

The New North naturally has a large place in the collection. The display will include samples of high grade bituminous sand and oil sands from the Athabasca country, silica sand and after the extraction of bitumen, carry oil from a well drilled on the Athabasca river, oil from the Peace River district, crude petroleum from Great Salt Lake, salt from the springs on Salt River, and gypsum from Peace River.

Sleeping Bags

An interesting statement was made recently by John L. Cope, the famous Arctic explorer, regarding sleeping bags. "The sleeping bags," he said, "are made from reindeer skin, with the skin inside. When new they weigh about 12 to 14 lbs, but after three or four years' use they weigh 75 lbs. The moisture from the body collects in the bag during the night and freezes, skin."

When next the bag is used the heat of one's body thaws the ice on the inside, and the water in due course, after another three or four weeks' use, the bag becomes a mass of ice inside and has to be thawed by the heat of the body.

"When the thawing process is complete, one spends the night sleeping in water, wrapped round in reindeer skin."

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Rheumatism, Aches—packaging which contains complete directions, including a list of ailments for which Aspirin is the genuine Aspirin—marked with the name "Bayer" or ten years. Now made in 12 tablets. Accept only "Bayer Tablets of Aspirin" as the genuine Aspirin. Aspirin is an unbroken "Bayer" sales will sell "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer!"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing Co. of Germany. With it will always be the Bayer Cross. Aspirin is the genuine Bayer product. Beware of cheap imitations. The Tablets of Bayer Company are marked with their general trade mark, the "Bayer Cross."

Local News.

E. L. Moo left for Idaho this week.

Miss Gertrude Aylwin, of Edmonton, was home over Easter.

Mrs. J. R. Laycock is visiting in Edmonton with her sister, Mrs. John Perry.

Dr. Budl has moved into his residence in the north end of Donold Avenue.

Nurse Clara Gill has established herself in town, and is boarding with Mrs. R. M. Whitelock.

Miss Nina Goodman, of Selkirk, visited in town with friends over Easter.

Mrs. A. Wancko returned on Saturday from a visit to friends in Toronto and other eastern points.

Mrs. Alice McCarther, of Omaha, Neb., is visiting with her brother, Louis Fleming.

Mr. and Mrs. M. B. Kyler are leaving this week on a visit to the old home in the States.

John Burce and family have moved to town, and are comfortable in their old residence on Smith Avenue.

Roy McMillan has rented the Bures farm, south-west of town and took possession last week. Roy is a hunter, and his friends will wish him success in his undertaking.

Archie J. Taylor had the misfortune to have an arm broken on Friday. He was carrying a horse and got crushed against the manger.

John Hagemann purchased a first prize bull calf at the Edmonton sale last week. Sam McCaughey also secured a fine Aberdeen-Angus calf. Prices for good animals are high.

W. E. Turner has a supply of provincial automobile licenses for owners should secure their licenses forthwith.

Geo. E. Bowker and P. A. McKelvey are opening a lumber yard at Donald Avenue. The boys are well known in this community, and a doubt will receive a full measure of public support.

Jas. Milburn celebrated his 82nd birthday on Monday, the 15th, and was much brighter and early receiving the congratulations of his many friends. Mr. and Mrs. Milburn have been married for 57 years, and it is pleasing to report that they are both hale and hearty.

The annual meeting of the Women's Council will be held in the Bank of Commerce rooms on Friday afternoon, the 16th. Officers for the ensuing year will be elected, and a full attendance is looked for.

Due to the severe weather, the sales have got something of a setback during the past week, but nevertheless prices have ruled good on the average, and with an improvement in the weather no doubt the remaining ones will be up to the average. A. T. Johnson's sale was the largest of the season, and brought \$10,500.

Many Ponokites visited Edmonton over Easter.

A Ladies' Benevolent Society was organized in town this week. Jas. Parnell is holding a sale on Friday, the 16th.

F. L. McEwen is offering his farm for rent. As will be seen by advertisement it is an ideal farm, and will be readily taken up.

The late Mrs. Spackman's household effects will be sold in town on Saturday afternoon.

Would the lady who broke into John Hagemann's residence late Saturday night please return the two tiles she took off his "Home Comfort Cook Stove." He requires them in the worst way.

HINKLEY.—On Sunday, April 14th, to Mr. and Mrs. Geo. Hinkley, a daughter.

SCHULTZ.—On Monday, April 15th, to Mr. and Mrs. Geo. Schultz, a daughter.

REES.—On Saturday, April 13rd, to Mr. and Mrs. Tom Rees, a son.

Remember Jas. Parnell's auction sale on Friday, the 16th.

Gavin Spence is in town with his expert piano tuner, Robert Moffat, late Reg. Q.-M. Serg. C.E.F., in France and Siberia.

Mr. Moffat was on this territory prior to the war, and having got his hospital discharge a month ago has rejoined Mr. Spence. Only work in town is being done at the time, and they will return when roads are passable for country patrons.

Rev. Father Van Wetten bade his flock in this district goodbye at the services Sunday morning. He is leaving to make his home at the coast on an early date. During the nineteen years he has been in charge of the R.C. congregation here he has made many friends, and is held in high esteem. The genial Father leaves with the best wishes of all classes and denominations in town and district, and may he find his surroundings in his new home as congenial as they have been in Alberta.

H. B. Shively has just received a line of summer foot wear. His stock is fully up to that of last year, and parties are asked to call and make an inspection.

Jas. Parvill's auction sale on Friday the 16th.

Lady's black mail lost on town ship line. Please leave at Herald Office.

CHURCH NEWS

Baptist Church services for Sunday, April 11th.—Brooks: Sunday School at 11 a.m.; church service at 12. Ponoka—Services at 7:30 p.m. All are cordially invited to be present.

The prayer meeting for April 11th will be held in the Baptist Church commencing at 8 p.m. A welcome awaits you at this meeting.

A meeting will be held at Brooks schoolhouse for the purpose of organizing, and to consider ways

and means of making the work successful. The ladies will serve refreshments. There will be a short programme. Please keep with or without stock and implement with or without stock and implement. Apply, J. Steffen, Morningville.

St. Mary's Church.—There will be an Easter service on the Sunday after Easter, April 11th, at 7:30 p.m.

Union Church, Sunday, April 11th.—11 a.m. and 7:30 p.m. The preacher will preach at both services. 11:45 a.m., Sunday school service to which all are earnestly invited. Chas. Bishop, Pastor.

Union Church choir practice on Friday at 8 p.m.

Special meeting of the Ladies' Aid on Friday at 3:30 p.m.

Trail Rangers for boys from 10 to 14 years. Every Monday at 7:30 p.m.

There were large attendances at the Easter services at the Union church on Sunday. At the evening service the loose collection, which amounted to \$23.75, was devoted to the Armenian Relief Fund. A special offering is being taken at the Sunday school next Sunday morning for the same object.

ST. MARY'S CHURCH

Colonization Plan For the West Is Approved

Calgary. — Representatives of the leading financial men of western Canada and others attended the opening session of the two days' convention of the Western Canada Colonization Association, held in the Falitzer hotel, last night. It was resolved to endorse the tentative general plan outlined by Mayor M. A. Brown, of Medicine Hat, which includes a million and a half dollar scheme for the settlement of western lands.

It was with much sobriety of thought that the various speakers approached this ambitious scheme. At the opening session, outside of the point of actually forming such an association, being definitely decided, the various resolutions were not entered upon. These will engage the attention of the convention later.

The morning was chiefly taken up by an extensive review of the suggested formation of such an association by Mayor Brown. "It is unnecessary to argue," he said, "that the business men of Western Canada should not interest themselves in the question of colonization. If we are going to develop western Canada we must develop our great agricultural industry, and business men must be vitally concerned and help to develop it in co-operation with the government of the

Mr. Brown went on to relate that they could not depend entirely upon governments to carry on the great enterprise they had in hand. "We

Three were very strong reasons why such an association should be formed, he continued. First, because the government could not cope with the development of the province of Quebec, he said, the ministers of education, health and social services could not do their job. The second reason was that the province of Quebec was not doing its job. The third reason was that the province of Quebec was not doing its job.

Canada, he said, needed more population to pay for their national responsibilities and the only way to do this was to develop the natural re-

sources of the country. If they could increase the population of western Canada, every business man of the west would profit thereby.

Grand Duchess Olga to Reside In Denmark

Constantinople.—The Grand Duchess Olga of Russia, sister of former Emperor Nicholas of Russia has left for Serbia, en route to Denmark, where she will reside permanently. She still firmly believes her brother and his family are alive.

Hoover for President

THE HERALD.

Published by F. E. Algar, Ltd., Ponoka, Alberta.

Glen Fallow & Vicinity

We have had another snow storm and the roads are all drifted full. It seems spring will never come, and farmers are running short of feed.

Eliof Nelson spends his time listening to his new phonograph, and thinking of the happy summer days gone by.

The doctor was out last Tuesday to visit Mrs. Osterlin's mother, who has been quite poorly.

George Clark has purchased his supply of seed potatoes from the Haring boys.

Scott Connor was down with the flu lately, and was quite sick.

Mr. and Mrs. Matt Rasmussen have a new daughter at their place.

Mr. Black has purchased the barn of John Haring's south quarter, and will move it on his O.P.R. land.

Sam Clark was been hunting for his pinto mare which has strayed away.

The Johnsons sale was well attended, and everything sold well, especially the furniture and implements.

Milton Chapin was a Ponoka visitor last Tuesday and Wednesday.

A Maki purchased 25 head of heifers at the Johnson sale.

James Moore and family arrived here from Detroit, Michigan, recently to purchase land under the Canadian Soldier Settlement Loan. Mr. Moore has located to the Biddinger neighborhood. He served in the Canadian forces.

Mr. and Mrs. Frank Nejdley and son Delmar, Mr. and Mrs. O. S. Chapin and family, Mr. and Mrs. James Moore and family and Mr. Archer were visitors at the Fred Carter home last Sunday. A good time was reported.

Mrs. Joe Brodie is quite busy these days knitting stockings and sweaters for some newly hatched chickens.

Frank Nejdley had the misfortune to lose a cow and calf lately.

Any one bothered with roup in turkeys would do well to try the following—First give coal oil, if that fails, give ten drops of carbolic acid in a good big teaspoonful cold oil, stir well, and pour in its nostrils and down its throat, being careful not to get any in its eye. In five minutes afterwards give sweet milk to off set carbolic acid. Then one teaspoonful carbolic acid in 2½ gallons drinking water for several days. This is a sure cure.

Minard's Liniment
The Swift Current plant of the Saskatchewan Creamery Company reports that the business done during the first ten weeks of this year, as compared with the corresponding period in 1919, is showing an increase of 100 per cent. This is all the more remarkable since Swift Current is in the heart of the so-called "dry zone" of Saskatchewan, where during the past year the wheat crop was much below normal. It is accepted as evidence that the amount of rain may seriously affect grain crops. It has no apparent effect on the dairy industry. The butter output of the Swift Current plant in 1919 was 199,054 pounds, according to figures received at the dairy branch of the provincial department of agriculture. This creamery is a branch plant of the Saskatchewan Creamery Company which has other branch plants in various parts of the province. Since January first the total output of all branches shows an increase of approximately fifty per cent over the corresponding period last year. The faith which the company has in the future of dairying in the southern and western portions of Saskatchewan is evidenced by the fact that they are erecting new plants this year at Weyburn and Melfort, Crek.

Cook's Cotton Root Compound
A safe, reliable remedy for all ailments of the throat and lungs.
